LISTINGS AND APPROVALS

✓ ETL ANSI/UL 864.

DESCRIPTION

The NX-TEL2-MCCS and NX-TEL2-MCCS/P are assemblies that include a firefighter phone, phone enclosure and interface module.
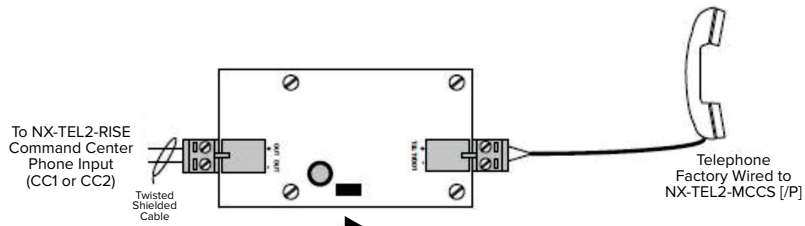

The difference between the NX-TEL2-MCCS and NX-TEL2-MCCS/P is that the NX-TEL2-MCCS/P includes a push-to-talk firefighter phone. Both assemblies interface the Firefighter Phone System2 command center telephone with the Shield NX-TEL2-RISE riser module.

Both the Shield CCM-01-ID2 (3x3 command center) and CCM-02-ID2 (3x5 command center) inner doors can support an NX-TEL2-MCCS[/P] assembly, mounted in the bottom left side double aperture.
