

SHIELD

Steel Pipes & Fittings

SHIELD

Introduction

SHIELD is a company created to cater to the infrastructure, fire protection and building services industries with a comprehensive range of products designed to be competitive and of assured quality.

We stay ahead of today's evolving market requirements by committing to a program of continued research and development.

We are able to maintain our high standards by ensuring that our worldwide manufacturing networks are the most advanced in the industry in Europe, Asia and America in terms of quality and delivery lead time. Our fully experienced and professional staff is there to provide engineering expertise and after sales service exactly when you need it.

Combine this with highly responsive and customer focused network of distribution centres around the world, you will find that customer satisfaction is what we excel at.

We are justifiably proud of our global client base. With offices and facilities in the UK and Middle East, we are able to comprehend the specific needs of your particular region.

Tensile Requirements

	Grade A	Grade B
Tensile Strength, Min, Psi [MPa]	48,000 [330]	60,000 [415]
Yield Strength, Min, Psi [MPa]	30,000 [205]	35,000 [240]

Wall = Wall thickness in mm
Wt. = Weight in Kg/m.
Available in black & hot dipped galvanized
* UL & FM details are available in their respective certificates.

NOTE: Hydrostatic pressure test applied as per ASTM Standards.

* SHIELD reserves the right to change the contents without notice.

Threaded Fittings

For HVAC & Fire Fighting Applications

Shield Threaded Fittings

Shield Threaded Fittings feature a complete range of ductile iron (D.I.) / malleable iron (M.I.) threaded fittings in a wide variety of configurations in sizes from ½" to 6".

Shield fittings are UL, ULC listed and FM approved for water line and fire protection applications.

Material	Ductile Iron ASTM A536, BS EN 1563 Malleable Iron BS EN 1562
Max. Working Pressure	500 Psi
Dimensions	D. I. - American Standard ASME B16.3, B16.14, B16.39 - Class 150 M. I. - British Standard BS EN 10242, BS 143 & 1256
Threads	American Standard ANSI B1.20.1 British Standard BS 21, ISO 7/1 (Taper)
Finish	Black or hot dipped galvanized

Grooved Fittings

for Fire Fighting, HVAC, Oil & Gas Projects

NOTE: Refer to UL/FM certificates for more information.

Shield Grooved Fittings

The Shield Grooved System provides an economical and efficient piping system solution and offers significant benefits when compared to conventional types of pipe connections including:

- Faster Installation
- Because there is no need for welding or heating, the Shield System ensures a safer and reliable working environment
- Ensures easy alignment
- Reduces noise and vibration
- Easy to install and remove in case of any maintenance requirements

Feature a wide range of coupling and fittings for piping applications in Air Conditioning, Fire Fighting Systems and water pipe lines etc...

Shield Grooved Systems offer 3 types of couplings:

High Pressure Couplings (Flexible) • Medium Pressure Couplings (Rigid & Flexible) • Light Pressure Couplings (Rigid & Flexible)

Material

Shield Grooved Coupling housing and other grooved fittings are cast from Ductile Iron to ASTM A536 Grade 65-45-12 in red paint or hot dipped galvanized, bolts are carbon steel to ISO 898-1 class 8.8 heat treated, hot dipped galvanized nuts and bolt can also be supplied upon request.

Gasket (C shaped)

Shield Grooved Coupling are available in various types of gasket.

Coupling with EPDM rubber gasket are widely used around the world and it conforms to ASTM D2000-1, Grade A.

It is important to use the gasket that suits your application, use the table below to select the optimum gasket.

Material	Temperature Range	Colour	General Recommended Application
EPDM	-34° C ~ +110° C	Green Strip	Hot water service, variety of diluted acid, oil free air, chemical. This is NOT recommended for Petroleum services.
Nitrile	-29° C ~ +82° C	Orange Strip	Petroleum products, vegetable and mineral oils, air with oil vapours. This is NOT recommended for hot water +66°C or for hot dry air over +60°C.
Silicone	-34° C ~ +177° C	Red Gasket	Dry heat and air without hydrocarbons up to +177°C and certain chemicals.

SHIELD Grooved Coupling EPDM Gaskets must be lubricated on the lips and outside back prior to assembly using silicon based non-petroleum lubricant.

Shield Grooved Red Paint fittings are recommended to use for indoor applications, in normal condition galvanized grooved fittings can be used for outdoor application, however, considering the atmosphere further coating protection may need to apply according to the project requirement. For more details about lubricant for other types of gasket, please contact us.

Shield Flexible Coupling

SDG-25 Standard

Shield Flexible Couplings allow controlled angular movement of the pipe to assist alignment and installation. The advantage of flexibility must be considered in the design or hanger and support spacing.

Shield Light Flexible Coupling

SDG-21

SDG-21 is designed for a maximum working pressure of 300psi. The flexibility benefits of this coupling can be used in applications where high pressure is not required.

Nominal Size	Pipe O.D.	Maximum Working Pressure	Dimensions			Bolt/Nut No. - Size
Inch	mm	Psi	X mm	Y mm	Z mm	mm
3	88.9	300	112.2	159.0	45.5	2- ³ / ₈ x 55

Shield Threaded Outlet Mechanical Tee (Continued)

The mechanical tee and cross features a gap between the bolt pads. Do not attempt to bring bolt pads together which would result in metal to metal when tightening bolts and nuts. Note that excessive torque may cause joint failure - the following table provides recommended bolt fastening torque.

Bolt Size Inch	Recommended Bolt Torque n-m
3/8	40 ~ 60
1/2	110 ~ 135
5/8	135 ~ 175
3/4	175 ~ 245
7/8	245 ~ 325

Shield Mechanical Tees allow a direct branch connection to be made on a pipe run where sufficient space allows a hole to be cut.
Material: Ductile Iron ASTM A536.
Gasket Standard EPDM. Threads are available to BSPT or NPT and can be supplied in red coating or hot dipped galvanized.

Pipe Support & Hangers

For Water, HVAC & Fire Fighting Applications

NOTE: Refer to UL/FM certificates for more information.

Shield Swivel Ring Hanger

Function

Designed for the suspension of non-insulated stationary pipe lines. The insert nut allows a vertical adjustment after installation, is tapped to NFPA reduced rod size standards. SD-HBF has a layer of felt which separates the pipe from the hanger to reduce vibration and sound.

Approval

Federal Specification WW-H-171E & A-A-1192 (Type 10)
Manufacturers Standardization Society MSS SP-69 & SP-58 (Type 10)
UL Listed/FM Approved.

Material and Finish

Pre-Galvanized coil adheres to ASTM A653 G90
Low Carbon Steel - Electro Galvanized to ASTM B633
Low Carbon Steel - Hot dipped galvanized to ASTM A123
Low Carbon Steel - Zinc Flake Coating to ISO 10683

8	1/2	6 13/16	2 7/16	7 15/16	12 1/4	1000

Note:

- Swivel Nut is coming along with hanger.
- Swivel Nut is available for 10mm and 12mm Rod size.
- Swivel hanger is also available in SS material upon request.

Shield Clevis Hanger

Function

Designed for the suspension of non-insulated stationary pipe lines. SD-HCF has a layer of felt which separates the pipe from the hanger to reduce vibration and sound.

Approval

Federal Specification WW-H-171E & A-A-1192A (Type 1)
Manufacturers Standardization Society MSS SP-69 & SP-58 (Type 1)
UL Listed/FM Approved.

Material and Finish

Pre-Galvanized coil (upto 4") adheres to ASTM A653 G90
Low Carbon Steel - Electro Galvanized to ASTM B633
Low Carbon Steel - Hot dipped galvanized to ASTM A123
Low Carbon Steel - Zinc Flake Coating to ISO 10683

36	1½	32	50	8¾	30	1½	9500

Note:

- Use of an upper locknut ensures proper performance. Pipe spacers provided on 30 and larger clevises. If ordering SD-HCF felt lined hangers for pipe size of 3" or under order the next largest size to allow for the thickness of the felt lining.
- "D" Adjustment (Top of cross bolt to bottom of hanger rod nut)
- When an over-sized clevis is used, a pipe spacer should be placed over the clevis bolt to prevent the lower U-strap from moving inward.
- Clevis hanger is also available in SS material upon request.

* Refer to UL/FM certificates for more information.
* SHIELD reserves the right to change the contents without notice.

Shield Pipe Clamp with Lining

Features

- Designed for Horizontal, vertical and suspended installations.
- Suitable for Steel, copper and PVC pipes.
- Welded Nut M8/M10 with option of M10/M12.
- Connection thread with M8/M10 dual-tapped boss.
- Side Screw: 6 x 20 – Phillip head with vicer.
- High rigidity due to reinforcing rib.
- With highly elastic vibration control lining, vibration control tested.

Approval

Manufacturers Standardization Society ANSI/MSS SP-69 & SP-58 (Type 12)
Federal Specification WW-H-171E & A-A-1192A (Type 25)

Material

Mild Steel & EPDM Rubber

Finishing

Electro galvanized as per ASTM B633 Standards

Shield Pipe Clamp

Features

- Designed for Horizontal, vertical and suspended installations.
- Welded Nut M8/M10 with option of M10/M12.
- High - Strength round welded connecting nuts.
- The two locking screws allow adjustment.
- Can be used as a pipe anchor point.
- Suitable for installations without vibration control requirements.

Approval

Manufacturers Standardization Society ANSI/MSS SP-69 & SP-58 (Type 12)
Federal Specification WW-H-171E & A-A-1192A (Type 25)

Material

Mild Steel

Finishing

Electro galvanized as per ASTM B633 Standards

Note:

- Measurements are subject to 5% tolerance.
- Other Sizes available on request.
- Hot Dipped Galvanized can be supplied upon request.

Shield Riser Hanger/Clamp with Lining

Features

Designed to act as a rigid support / guide for vertical pipes to control the suspension in pipeline. Equally useable in most of the pipe types.

- Strengthened bolts for high load capacity.
- Highly elastic lining for sound and vibrations control.

Approval

Manufacturers Standardization Society ANSI/MSS
SP-69 & SP-58 (Type 8)
Federal Specification WW-H-171E & A-A-1192A
(Type 8)

Material

Mild Steel & EPDM Rubber

Finishing

Electro galvanized as per ASTM B633 Standards

Shield Rubber Support Insert

Features

- Very high load bearing capacity.
- Dimensionally accurate as each piece is moulded.
- Tongue and Groove design for small sizes.
- Unique DOVETAIL lock for higher sizes.
- Excellent resistance to Deterioration / Distortion.
- Available with steel reinforcements for higher sizes.

Shield Beam Clamp

Features

Beam Clamps are designed to clamp hanger rod to the beam's top flange or bar joist. Universal open U design allows for adjustments and permissible to use in an inverted position on the bottom flange of the beam also.

Approval

Manufacturers Standardization Society ANSI/MSS SP-69 (Type 19 & 23)
Federal Specification WW-H-171E (Type 23) & A-A-1192A (Type 19 & 23)
UL Listed/FM Approved.

Material

Ductile Iron & Malleable Iron.

Finishing

Electro galvanized as per ASTM B 633 Standards.

Models

SD-CBC/CBCA 110 - 3⁄8" (10mm)
SD-CBC/CBCA 115 - 1⁄2" (12mm)
SD-CBC 210 - 3⁄8" (10mm)
